

**For those who  
were left holding  
the bag or who had  
to fulfill the  
position vacated by  
another!**

# Break it Down To Build it Up

So many times we start look at the problems and the complexities of the job, so that we become so overwhelmed long before we even get started. Yes, first we need to identify the problem area and weakness that will hinder us in obtaining our goal but once you come to a complete summation, don't just start right in. But take the time to break down the work into small workable and manageable components so then you might be able to visualize the possibilities. Remember when it is "line upon line

and percept upon percept here a little and there a little" you have rest.

# Before You Get Big Get Tech

He was referring to a better computer system but “in all thy getting get understanding.” Even a workman must “study to show himself approved.” It is not the fact that you are not fit for the job or even that so how you missed the call. But why wait for someone to show what to do or even wait for someone help you when in fact you have already identified of the areas of uncertainty. Get the understanding (knowledge) that you need. We have so many resources at our disposal. Ask and it shall be what and if you seek you shall find whatever you were looking for.

# Brand with Attitude

**“Hold fast to the confidence and rejoice in to the end.” The appointment was not given by mistake or by chance. You were meant to answer the call for the position even if it was left on you. Hold fast to that profession that you heard from the moment you said, “Yes.” Remember that it is that same confidence which will be rewarded. So don’t cast it away!**

# Hand Over Power Watch The Ideas Fly

Empower the people work with you and watch the ideas flow. As Jesus gave his people power, they believed and out of them flow river of ideas and opportunities. Ideas are planted in us and come forth as we believe. We can then utilize them in order to bring the project to a successful conclusion. We don't have to just patch up the ones that went before us.

# Sell Where Your Competition Won't

Sometimes you must seek help and support in some non-traditional places. The king told his people to "go to the highways and byways and compel them to come. Why fight over such a small base of volunteers and willing workers when Our God has given us "all things to be enjoyed?" When you think outside of the box you discover that they are more who wanted to be involved!

# First Prove It Then Fund It

We are commanded try the Spirit by the Spirit to see what kind of spirit it is. In the same manner we need to try a process before we fully commit to it. Even Jesus told us to “count the cost” to see if we can succeed and finish or else make a deal. We need to try the solutions on a smaller scale first and then if it work and produces the desired results then we can utilize the same process on a larger scale.

# Know When To Say No And When To Say Yes

So ideas and concepts you just have to say no to. And then there are other ideas and processes that can bring about an increase in productivity and energy when you say yes to them. We just have to let our yes be yes and our no be no for anything else is just evil (not conducive to a successful conclusion of the project).
